Math-In-The-News Project

The key component to this project is to follow directions. It is very important that students follow written directions and have a successful end product from following these directions.

1. Each student must have a creative title.

2. **5** articles that are highlighted where math is being used in each article.

3. Write a 3 to 4 sentence summary about how math is used in each article, and paste or tape to poster board.

NO STAPLES!!

*** Articles that have charts, graphs, stats, etc... should be included with the article if given.
